APPARATUS

AMENDMENT

Hon. Assistant Commissioner for Patents Alexandria, Virginia

In response to the Office Action dated May 2, 2002, please amend the above-identified patent application as follows:

IN THE CLAIMS

- 7. (once amended) An electrical connector as set forth in claim 1, wherein at least one of the opposed legs includes a locking feature configured to lockingly engage with a bottom surface of the substrate when the opposed legs are inserted into the reciprocal aperture in the substrate.
 - 15. (once amended) An electrical connector as set forth in claim 9, wherein at least one of the opposed legs includes a locking feature configured to lockingly engage with a bottom surface of the substrate when the first and second legs are inserted into the reciprocal aperture in the substrate.
 - 21. (Twice Amended) An electrical connector as set forth in claim 17, wherein at least one of the first and second opposed legs of each post includes a locking feature on the distal end configured to lockingly engage against a bottom face of the substrate when the first and second legs are inserted into a reciprocal aperture in the substrate.
